Art Unit: 3738

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-63, drawn to biomaterial, classified in class 514, subclass 393.
- II. Claims 64-186, drawn to process for modifying biomaterials, classified in class 424, subclass 402.
- III. Claims 187-194, drawn to biocompatible article, classified in class 428, subclass 2.
- IV. Claims 195-196, drawn to process for making bisimine intermediate, classified in class 514, subclass 186.

The inventions are distinct, each from the other because of the following reasons:

Inventions of groups 1,3 and 2,4 are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product of groups 1 and 3 do not require the specific process of making the product. It is clear that other processes may be used to modify the materials of groups 1 and 3. The process of group 2 and group 4 are independent of one another. The process of group 4 is directed to making a catalysts whereas the process of group 2 is directed to modifying a biomaterial with a surface catalyst. The biomaterial of group 1 is different from the article of group 3 in that the article of group 3 does not require the specifics of the biomaterials of group 1.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

This application contains claims directed to the following patentably distinct species of the claimed invention: If applicants chooses group 2, then applicant must choose one of the following process:

- 1-surface covalent conjugation
- 2-copolymerization
- 3-admixture

If applicants chooses group 3, then applicants must choose one of the following article:

- 1-stent
- 2-nerve growth channel
- 3-woven vascular graft
- 4-cardiac lead wire

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Mr. Harley Blosser on 3/29/02 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
